

2007 Affordable Rental Housing Inventory

AMI is Area Median Income for Sonoma County. Median income is the amount of income where half the County's households earn more and half earn less. HUD publishes AMI figures annually, by household size, and the figures used here are for a household of four persons. Thus, "50% AMI" means 50% of the median household income for four (\$77,800) or \$38,900.

Rental housing units counted in the inventories are those self-reported by the jurisdictions. A unit is in the 50% AMI inventory if a long-term rent restriction agreement is in place limiting the rent to an amount affordable to a household at 50% AMI. The 80% AMI inventory is similarly defined.

Population figures are from the 2000 U.S. census.

Sonoma County Affordable Rental Housing Inventory 2008

Overview

This inventory of rental housing units by jurisdiction was compiled by the Sonoma County Housing Coalition to assist Sonoma County renters in locating affordable units, to identify apartment complexes at risk of converting to market-rate rents as their long term affordability contracts expire, and to provide a basis for quantifying the total availability of taxpayer-supported affordable rental housing complexes, by jurisdiction.

What was counted?

Rental housing complexes that have multi-year governmental contracts to restrict the rent amounts of some or all of the units are included in the inventory. These affordability contracts are generally associated with development financing provided by units of government; local, state and federal.

How was the inventory conducted?

The Sonoma County Housing Coalition contacted staff at all ten units of local government in Sonoma County - the Town of Windsor, the County of Sonoma and the cities of Cloverdale, Cotati, Healdsburg, Petaluma, Rohnert Park, Santa Rosa, Sebastopol and Sonoma. These staff members provided data for their jurisdictions.

What do the terms mean?

Standard conventions for affordable housing development and finance were used in this inventory. Affordable units are combined into two income-based categories: units with contractual restrictions based on serving households with income at or below 50% of the Area Median Income (AMI) and those restricted to serve households with income between 50% AMI and 80% AMI, as published by the U.S. Department of Housing and Urban Development (HUD). HUD publishes AMI figures by family size. For example, the 50% AMI figure for a single individual in Sonoma County is currently \$27,250 and for a household size of four, the 50% AMI figure is \$38,900. The 80% AMI figure for a single person is \$43,050 and for a household of four, the 80% AMI figure is \$61,500.

Population figures for each jurisdiction are used to express total inventory numbers per 1,000 persons in order to more readily compare jurisdictions of vastly different populations. The figures used are from the 2000 U.S. Census.

2007 Affordable Rental Housing Inventory

AMI is Area Median Income for Sonoma County. Median income is the amount of income where half the County's households earn more and half earn less. HUD publishes AMI figures annually, by household size, and the figures used here are for a household of four persons. Thus, "50% AMI" means 50% of the median household income for four (\$77,800) or \$38,900.
